

PINEHURST HEALTHCARE AND REHABILITATION CENTER

Serving Moore County and the Sandhills Region for more than 25 years, Pinehurst Healthcare and Rehabilitation Center has grown with the region and continues to meet its ever changing healthcare needs. Today, we provide a variety of services which meet the medical, social, and personal needs of all our residents.

At Pinehurst Healthcare and Rehabilitation Center we offer a number of living, healthcare, and rehabilitation options in an environment designed to enhance your quality of life. Together, we will develop a personalized healthcare plan to fit your individual needs. You will meet new friends, enjoy activities, and receive professional healthcare and rehabilitation services from our staff.

EMBRACE LIFE

Private Rehabilitation Suites

Our private rehabilitation suites are specifically designed for individuals needing short-term, intensive physical, occupational, and speech therapy services. Specifically designed to accommodate individuals who will be returning home; each spacious suite includes a flat panel television and private shower. Our suites are conveniently located near our spacious, newly-renovated rehabilitation department and are accessible through our Rehab Center's private entrance.

Respite Stay Services

Caring for a loved one in the home can be a tiresome task. For those qualified individuals, we offer short-term (not to exceed 14 days) respite stay services. Respite stay gives the primary caregiver a break while our staff coordinate and provide all the necessary healthcare services.

Rehab Services

The comprehensive Occupational, Physical, and Speech Therapy Services offered by our rehabilitation staff, allows you to maximize your rehabilitation potential. Whether it's for a short-term stay related to an elective orthopedic procedure or a longer, more intensive stay, together, our nursing and rehabilitation staff will work with you to develop the best program tailored to your individual needs.

Skilled Nursing Services

Staffed with nurses 24 hours per day, our clinical staff provide a variety of complex nursing services targeting your specific medical needs. From comprehensive wound management to IV's, medication and disease management; clinicians, in consultation with your in-house† attending physician; will work with you so that you may maintain your highest level of well-being.

† Physicians credentialed by the facility to provide services to our residents. Ask our admissions staff if your physician is credentialed by the facility and how we can manage your admission, if your physician isn't an in-house provider.
